

## Bath Cleaning Process

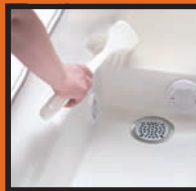

Place the chair in the tub, then:

	<p>Close and lock the tub door and close the drain.</p> <p>Turn air spa blower "ON."</p>
	<p>Turn the black SELECTOR KNOB to "TUB CLEANER."</p> <p>Turn the ON/OFF valve located next to the Selector Knob to "ON."</p>
	<p>Watch for foamy cleaning solution to come out of all air spa outlets.</p> <p>Use tub brush and cleaning solution to scrub tub surface and chair.</p>
	<p>After the cleaning solution has come out of the outlets for about 30 seconds or when there is about 1" of cleaning solution in the foot well, turn the black SELECTOR KNOB to "RINSE."</p>
	<p>Continue scrubbing tub. When done, open drain &amp; rinse the tub &amp; chair with the shower wand.</p> <p>When fresh water comes out of all air spa outlets, turn the ON/OFF valve to "OFF."</p>
	<p>Leave the air spa blower on for a few moments to force the remaining fresh water out of air lines.*</p> <p>Turn air spa blower "OFF."</p>

\*Please note that your system is equipped with a purge cycle that will automatically engage the air blower twenty minutes after each use to ensure the air lines are completely dry. This is a safety feature that has been built into your system to ensure the best possible infection control protection. If you begin the next bath prior to the twenty minute mark, the system will automatically re-set. Otherwise, the air blower may engage while you are beginning the next bath. If this occurs, let the system run its course as it lasts only 60 seconds.

## Bath Disinfecting Process

After cleaning process, place the chair in the tub, then:

	<p>Close and lock the tub door and close the drain.</p> <p>Turn air spa blower "ON."</p>
	<p>Turn the black SELECTOR KNOB to "DISINFECTANT."</p> <p>Turn the ON/OFF valve located next to the Selector Knob to "ON."</p>
	<p>Watch for foaming disinfectant solution to come out of all air spa outlets.</p> <p>When there is about 1" of disinfectant in the foot well, turn the ON/OFF valve "OFF" and turn air spa blower "OFF."</p>
	<p>Using the tub brush, apply the disinfectant solution to the tub surface and chair and let stand for TEN MINUTES.</p>
	<p>After the disinfection period: Turn "ON" the air spa blower. Open the drain.</p> <p>Turn the black SELECTOR KNOB to "RINSE."</p> <p>Turn the ON/OFF valve to "ON."</p>
	<p>While the dispensing system flushes the air spa lines, use the shower wand to rinse the tub surface and chair.</p> <p>When done rinsing the tub and when fresh water comes out of all air spa outlets, turn the ON/OFF valve to "OFF."</p>
	<p>Leave the air spa blower on for 60 seconds to force the remaining fresh water out of the air lines.*</p> <p>Turn air spa blower "OFF."</p>
