Skin Care Essentials

Essentials for You, Your Staff and Your Residents

More than 40 years of experience have gone into developing Apollo’s premium skin care essentials. Our leading quality products are specifically formulated with sensitive skin and skin integrity in mind; addressing every need, from hygiene and odor control to maintaining healthy, resilient skin and restoration of damaged areas.

Premium Ingredients to Protect and Rejuvenate

The quality and makeup of skin care products make a vast difference in outcomes. The premium ingredients used in all of our lotions, bath oils, body washes and shampoos offer the very best in skin care, to effectively rejuvenate and moisturize, support healthy pH and provide relief and protection to irritated areas and chronic conditions.

Spa & Equipment Care

Effective medical-grade cleaning and disinfecting products for spa and shower rooms and beyond

Apollo equipment care products are formulated for the stringent requirements of the healthcare industry. These powerful cleaning solutions are the most effective available, yet competitively priced.

All of Apollo’s cleaning and disinfecting products, as well as our skin care offerings, are specially formulated to support trouble-free operation of our Remedy® UV Water Purification System, ensuring continuous infection control.

**Skin Care Essentials**

**Hygena™ Shampoo & Body Washes** provide gentle, yet effective hygiene and eliminate persistent orders. Formulated to support the skin’s natural pH, rinse completely and guard against soap dermatitis and irritation.

**Therasol™ Natural Bath Oil & Skin Conditioner** effectively moisturizes skin during the bath and provides after-bath warmth as it absorbs into the skin. It disperses completely in bathwater to moisturize the entire body, condition skin and retain moisture. Excellent for foot soaks, massages, shaving, and more.

**Thera 10™ Intense Moisturizing Cream** and **Thera 5™ Moisturizing Lotion** are formulated with urea and lactic acid, the skin’s natural humectants, to replenish skin moisture while reversing the effects of aging and dryness. Both absorb quickly, leaving no greasy residue. Urea also supports nail and cuticle health. Our creams and lotions are a great example of how premium formulations deliver superior results.

**Apollo Cream™ Conditioning Barrier Cream** instantly relieves dry, cracked or irritated skin, providing an effective treatment for symptoms associated with eczema, psoriasis and incontinence. Natural moisturizers along with Vitamins A & D help relieve irritated skin, while beeswax provides a protective barrier against further irritation.

**Perine™ No-Rinse Foaming Cleanser** is a rinse-free skin cleanser for convenient hygiene without the need for water. Eliminates embedded odors and conditions skin, leaving it feeling smooth and satiny. Perfect for bed baths. Use in conjunction with Apollo Cream for superior incontinence care.

**Wall Dispensers**

Apollo offers wall dispensers for Hygena Body Wash, Hygena Foam Body Wash, Perine No-Rinse Foaming Cleanser and Therasol Skin Conditioner. All are reservoir-style with visible product level for easy maintenance.

No need to wait until a cartridge runs out or throw out unused product. Just pour in more product when reservoir is low or set it on a regular refill schedule.

Foaming Dispensers are highly efficient as much less product is needed when dispensed as foam. Dispensing only 0.7ml of product with each pump = 1400+ pumps per fill!

---

**Ionic Air Sanitizer**

**DuO™ Ionic Air Sanitizer** actually eliminates offensive odors through ionization, making it far more effective than “air fresheners” that only cover up odors. DuO is available in a variety of fresh scents.

---

**Equipment Care**

**Turbo Clean™ Pre-Disinfectant Detergent** eliminates the toughest soils throughout your facility. It’s so effective that it meets every quaternary disinfectant’s requirements for pre-cleaning of soiled surfaces.

**Cid-A-L™ II Quaternary Disinfectant**, at twice the concentration of most brands, is your most effective and economical means of protecting your residents from most bacteria, fungi and viruses.
